

STUDY PROGRAM: UNIVERSITY UNDERGRADUATE DEGREE IN PSYCHOLOGY

CORE LEARNING OUTCOMES OF STUDY	
<i>Learning outcomes of study program</i>	<i>Individual study program outcomes</i>
Interpretation of psychological theory, fundamental psychological processes and traits	1. Explain fundamental psychological processes and traits (perception, memory, thinking, language, intelligence, motivation, emotions, personality, social behavior) and their neurobiological and evolutionary origins, and mechanisms of development
	2. Link and evaluate fundamental cognizance in psychology like fundamental and applied science
	3. Critically assess scientific knowledge in psychology and related and complementary scientific disciplines in the interpretation of scientific and professional literature
	4. Explain and analyze the historical development and theoretical systems of different branches of psychology
	5. Classify and differentiate fundamental disorders of psychological function
	6. Explain features of communication and efficiently express and interpret information in communication
Scientific research into basic problems of psychology and related fields	1. Use methodology of scientific research in solving problems in psychology and other fields
	2. Apply statistic reasoning in the preparation, implementation and interpretation of results in empirical research
	3. Select and use appropriate procedures in computer programs for basic statistical processing and database work as well as word processing and data presentation programs
	4. Critically analyze and evaluate the suitability of conclusions reached in psychological research
	5. Explain the development and problems of measurement in psychology
	6. Explain and apply chosen statistical approaches and interpret results
	7. <i>Plan and conduct research, analyze, interpret and present obtained results</i>
Interpretation of characteristics of individuals, groups and organizations	1. Explain relevant characteristics of individuals
	2. Explain and apply primary character assessment procedures to individuals
	3. Explain relevant features of groups and organizations
	4. Explain and apply primary character assessment procedures to groups
	5. Independently form and present results of different forms of works to experts and laymen in both an oral and written format
	6. <i>Describe and explain contemporary accomplishments in selected fields and topics</i>
Describing the field of applied psychology	1. Describe and explain the opportunities of applying basic theoretical knowledge and skill in a psychologist's practical work in the educational and school systems
